Change the way your office talks

Working freedom

The hectic tempo of modern office life places extreme demands on you. You're expected to do increasingly more, do it quicker and communicate it clearly and accurately.

GN has developed the Jabra GN9300e Series to help you meet these demands with ease. Designed to

change the way you use your telephone, the Jabra GN9300e Series will free you from your desk and telephone handset, giving you greater comfort and helping you to get more done more easily.

So why not take the step into a new world of mobility within the office? Escape from your desk. Move hands-free and unhindered any time you want. Revolutionize the way you work!

Changing the way you talk

The new Jabra GN9300e Series of wireless office headsets marks the latest in a long line of innovations from GN over the years. And they will change your office forever. Leading this revolution is the high-performance Jabra GN9350e, the ultimate example of wireless headset functionality. This headset is an industry first: the first to provide DSP-enhanced sound clarity and the first wireless headset with wideband IP sound. For use with both desk telephones

and PC-based IP telephony, the dual connection Jabra GN9350e meets your every need.

Savor the freedom of hands-free efficiency and a featherweight, ergonomic design. Each of the 3 new Jabra GN9300e Series headsets is a groundbreaking, stylish product designed to push back the limits. Whatever your needs, you'll find a Jabra GN9300e that's made to suit you. Office conversation just changed forever.

- Lightweight 26 gram design

The Jabra GN9300e Series: Headsets have never sounded so good

Superior sound

The Jabra GN9300e Series headsets provide you with crystal-clear, peak-free sound. A new beam arm with a noise-canceling microphone and enhanced wind noise reduction guarantees clear voice transmission, even in noisier environments.

The Jabra GN9350e uses Digital Signal Processing to purify the incoming signal, enriching sound quality. And IntelliTone™ makes sure there's always a safe consistent volume level.

Increase your range

Freedom to move around your working environment lets you focus on what's important, reducing stress and improving efficiency. All Jabra GN9300e Series headsets let you interact with colleagues, your PC or telephone within a range of up to 120 meters, enabling you to communicate, and exchange and refine ideas throughout your office space.

Work in comfort

The more comfortable and relaxed you are, the more you can get done. The Jabra GN9300e Series eliminates the neck and muscle pain caused by cradling a telephone handset between your neck and shoulders. You can also choose the wearing style with soft and comfortable earpiece materials that best matches your needs, and a lightweight, ergonomic construction helps you feel at ease throughout the working day.

Time to talk

The Jabra GN9300e Series headsets offer more than enough talk time for an entire working day. You can keep an optional second battery charged in the base and even hot-swap it to give you around-the-clock talk time. So whichever model suits you best, you can feel free to talk and move without the worry of being cut off.

Headset in stand

The small size and sleek stylish look of all the bases in the Jabra GN9300e Series mean they match perfectly with any desk. Dock the headset in the stand to charge batteries and in the Jabra GN9350e, to join conference calls. You can make and receive calls freely anywhere in your office environment up to 120 meters from the stand.

New boom-arm

The Jabra GN9300e Series boom arm with its refined noise-canceling microphone and enhanced wind noise reduction ensures your voice is always transmitted clearly, even in noisier environments.

Talk button

Answer calls by pressing an easily reached, stylish talk button; the link indicator will then light. The Jabra GN9350e's talk button is also used to join in on conference calls – secondary headsets just have to dock and press.

Wearing styles

Choose from three interchangeable wearing styles*, and enjoy a lightweight, comfortable fit with softer and more comfortable earpiece materials.

*JabraGN 9350e: Earhook, neckband, headband

Base unit

The Jabra GN9330e base unit could not be simpler to setup. An easy-to-operate slide control facilitates dial tone adjustment. After securing a clear, audible dial tone the microphone volume wheel can be used to set the transmit volume of your voice, ensuring that the conversation will be heard properly at both ends of the line.

Rocker switch and speaker

The rocker-switch volume control is both intuitive and easy to use. It let's you adjust headset speaker volume during a call or mute the outgoing signal.

Parameter control

The Jabra GN9350e base unit's LCD display allows you to tailor an extensive range of parameters to your own specific needs:

- Transmit volume setting
- Remote handset lifter selection, Electronic Hook Switch (EHS) compatible
- Range/power selection
- Treble/bass selection
- Automatic control of audio output (IntelliTone™)

Maximize communications convenience

The Jabra GN1000 Remote Handset Lifter is the perfect accessory for your Jabra GN9300e Series headset. Using the lifter enables you to answer and end calls while away from your desk. The Jabra GN9350e also supports Electronic Hook Switch (EHS)*, which facilitates remote hooking on or off of calls, without the use of a Jabra GN1000 RHL.

*Only applicable on selected telephones

IP

The Jabra GN9350e is unique in its capacity to offer both desk phone and PC-based IP telephony connections. This dual connection capability means you have the ability to move with technology and enjoy the benefits of both. The USB ports in the Jabra GN9350e and in the IP specific

Jabra GN9330e USB facilitate easy connection to your computer; subsequent IP calls can then be automatically routed from the computer to the headset.
